

This is a block photo page layout. It may be used right side up, upside down, or sideways. Use this guide to trim your photos or trace this onto lightweight plastic, and cut out the blocks to make a more permanent guide. Enjoy!

If you are using a 12" x 12" page layout, you can cut two sets of photos for the vertical blocks on the left side of this page, and use the extra photos on the left or right of this layout. See sample variations below.
